Adding Stock to PM

This will open a pop up box with all invoice items in here
Find the dispensary item you have just received and update by adding to the existing quantity with stock that has arrived. If that item has been out of stock and is showing a minus figure, subtract this from your arrival.

For out of stock products with orders waiting
Allocate new stock to the orders that are waiting for their products to be sent.
Orders waiting for out of stock products always take priority.
